SUMMARY

B.Tech Data Science student (NIET, AKTU, 2024–2028) with hands-on experience in machine learning, NLP research, and full-stack development. Built a fake news detection pipeline achieving 0.94 F1-score on 40,000+ samples using TF-IDF and Logistic Regression. Developed 3+ full-stack web applications and automated lead generation systems using Python and Node.js. Managing social media growth and content strategy for 5+ D2C brands as part of a branding agency. Strong foundation in Python, data analysis, and business communication. Seeking internship opportunities in data science or software development.

EDUCATION

Noida Institute of Engineering & Technology

Bachelor of Technology in CSE (Data Science) | AKTU

2024 – 2028

Greater Noida, UP

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, SQL, HTML, CSS

ML & Data Science: Scikit-learn, Pandas, NumPy, TF-IDF, Logistic Regression, LIME, Confidence Calibration

Web & Backend: Flask, Node.js, Express.js, REST APIs

Databases & Tools: PostgreSQL, Git, GitHub, Docker, Postman, Jupyter Notebook, Apify

Automation: n8n (Workflow Automation), Apify, Axios

Other: Social Media Strategy, Content Creation, Client Management, Project Management

EXPERIENCE

Social Media & Client Manager – Indevaa Studio

Dec 2025 – Present

Branding & Storytelling Agency | D2C Social Media, Lead Generation, Client Deliverables

Greater Noida, India

- Managed client onboarding, social media strategy, and content delivery for 5+ D2C brands across India.
- Built automated Instagram lead generation pipelines using Apify, reducing manual prospecting time by 60%.
- Delivered client reports, 6-month growth roadmaps, and Instagram content calendars with 30-day execution cycles.
- Created short-form content strategies including Reels scripts, carousel copy, and brand-aligned captions for 2+ active clients.
- Drafted 10+ client contracts, pricing proposals, and service agreements independently.

PROJECTS

Fake News Detection using NLP | Python, Flask, Scikit-learn, TF-IDF, LIME, Ollama 

2025

- Built end-to-end fake news classifier using TF-IDF + Logistic Regression achieving **0.94 F1-score** on 40,000+ samples.
- Developed full-stack app with Flask REST API (6 endpoints) and JavaScript/HTML/CSS frontend for real-time classification.
- Integrated Ollama LLM layer (TinyLlama) for natural-language explanations; hardened with CORS, rate limiting, and API key auth.

Nexus – Full-Stack Community Forum Platform | PHP, JavaScript, HTML, CSS 

2025

- Built a Reddit-inspired discussion platform with user auth, threaded comments, voting, and profiles across 8+ distinct views.
- Implemented role-based admin panel for content moderation using vanilla PHP modular routing and JavaScript.

Auto SaaS Builder | JavaScript, Node.js, Axios 

2025

- Built automated SaaS builder with 4-layer modular architecture: orchestrator, scheduler, agents, and services using Node.js.
- Implemented agent orchestration, scheduling logic, env-based config (dotenv), and GitHub Actions CI/CD support.
